

A METHOD AND STRUCTURE FOR SUPPORTING DATA STREAMING BY
A SCSI INITIATOR DURING THE DATA IN PHASE OF THE
PACKETIZED SCSI PROTOCOL

5

B. Arlen Young

ABSTRACT OF THE DISCLOSURE

10 A method for supporting data streaming by a SCSI
initiator includes receiving a data packet information
unit in a Packetized SCSI Protocol Data In phase. The
SCSI initiator also receives a signal in said
Packetized SCSI Protocol Data In phase to indicate
whether a header packet information unit or another
data packet information unit is to be received next in
15 said Packetized SCSI Protocol Data In phase.
